

**Build your skills and
advance your career**

With a GPRO Fundamentals of Green
Building certificate in your toolbox.

USGBC-LA is partnering with Urban Green and LAUSD to bring you an opportunity to further your career growth. Join the 16,000+ building professionals from across North America who have completed GPRO training, and add a GPRO certificate to your resume!

GPRO Fundamentals qualifies for 4 AIA and GBCI CE Credits.

Set yourself up for professional success in sustainability by enrolling in this 2-day virtual training course.

DELIVERED ONLINE
2 Day Virtual
Training Sessions

DURATION
2 Hours per session
4:30 PM - 6:30 PM

FOR YOUR TEAM
Enroll today and learn
with your peers

The construction industry is moving quickly towards greener, high-performance buildings, creating increased demand nationally for sustainable building skills.

Learn the foundational concepts of sustainability that provide an overview of the essential strategies and work practices that make buildings more efficient, healthy, and resilient. GPRO Fundamentals of Building Green covers the “green gap” between standard trade skills and the new awareness required to implement sustainable and energy-efficient building practices successfully.

This training is ideal for anyone who needs a better understanding of high-performance buildings, including sales or administrative staff in real estate, construction, architecture, or engineering, workforce development providers, facilities and operations staff, and college students interested in entering the building or construction industry.

What Participants Learn

- How reducing building energy will reduce the effects of climate change
- Basic elements of green, high-performance construction, and building operations
- Role of trades on high-performance job sites
- Energy-consuming building systems and some strategies to reduce building energy use

Registration includes a course e-book and an online exam. Participants who pass the exam with 80% or higher become GPRO Fundamentals of Green Building Certificate holders.

Meet the Presenter

Wayne Alldredge

LEED-AP, WELL-AP, CEM, CEA, CBCP, EBCP,
CMVP, GGP, CalCTP-AT, HERS, ENV-SP

Wayne has been in the building industry since 1988 making buildings work better. He has worked in building automation, maintenance, operations, energy management, new construction, and Kaizen culture development for companies like Johnson Controls, ABM, Equity Office, General Electric, JLL, his own consultancy Improvement Facilitation, and is currently Director of Energy Services at VCA Green. He's on the Board of Directors for an Educational Non-profit and donates time to clean-tech accelerators. He holds over 10 certifications and teaches GPRO Fundamentals, O&M, and Construction Management.

Why attend a GPRO training?

- Learn from a curriculum that takes a trade-appropriate, systems-thinking approach to teach—systems thinking is a key principle of the design, construction, and operation of high-performance buildings. It's critical for workers to know not just how building systems work, but how they work together.
- GPRO instructors bring the training to life through deep industry knowledge, real-world experience, and an engaging teaching style. Our instructors consistently earn Excellent ratings from students across the country.
- Earn your GPRO certificate, which empowers participants to integrate green building practices into their everyday work. The GPRO Certificate signifies an understanding of high-performance principles and a passion for efficient and healthy buildings.
- GPRO is officially the first green building training program to qualify under LEED Pilot Credit 81. Please visit USGBC's website for more information about PC81 for LEED v4.1.
